UpToDate Image Search

UpToDate provides an option to limit search results to Graphics, which may include images, tables, figures, and algorithms.

Search UpToDate and select the blue magnifying glass button to initiate the process.

By default, All topics related to the search are listed on the left, and the Show Graphics, located in the Topic Outline menu, link will display images for each topic. Selecting Graphics (blue arrow) provide images for all of the search results (sarcoma in this example).

Note: when viewing an image thumbnail, the Export to PowerPoint option appears.
